iGREEN®

Company Profile **iGreen Go Pte Ltd**

iGreen has roots in the oldest food packaging manufacturer in Singapore more of than 4 decades with manufacturing factories owned in Singapore, Bangkok and Sri Lanka. The German machines locally produces packaging, supplies to every famous name F&B, and our packaging is found in every home in Singapore, used everyday, every week.

iGreen founders have deep knowledge, and high expertise in manufacturing, moulds, cutting-edge design, machinery, material composition, extrusion of raw materials, quality control, production processes, handle immediate feedback regarding any problems faced by customers to ensure only the best is delivered to our clients.

In addition, the company has decades long experience and track record with our clients for excellent, prompt, quick, reliable customer service which puts our key managers as the people F&B managers call when they need premium solutions for food packaging.

Taking pride into our work is foremost, with ethics as the driving force of our actions in the food packaging industry and undertaking the world responsibility to reduce plastic pollution as our own.

It starts with me and you.

Hence, iGreen has a special purpose here to provide the best for F&B in Singapore, to serve our clients with sustainable solutions, at prices lower than plastics, and fill the gap of poor customer service with service deserving of a king for you.

Products 100% Biodegradable & Compostable

Our researched and developed materials have been trademarked with IPOS and every of our designs marked with a unique registered design protection serial number.

Organicware and Earthware are plant-based material. Our sales representative assigned to your company will understand your needs better to see which material suits your needs.

Responsibility of Reversing Plastics Pollution

As a well-known and trusted plastics manufacturer for decades globally, we are at the forefront and feel the huge responsibility of reducing and even eliminating plastics pollution from Earth. We do so with iGreen, vigorously encouraging and promoting compostability as an expert supplier and packaging confidante..

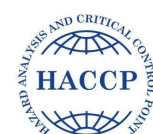

Local Manufacturer

iGreen has local manufacturing factories in Singapore, several factories in Bangkok, Thailand, Sri Lanka and compostable manufacturing facilities in Jiangsu, China. Our total workforce in our proprietary factories globally amount to over 2000 workers under our associated company with and without the same name.

Years of Track Record

Our factories globally have been around for more than 1 century combined. In Singapore, 43 years. In BKK, 31 years. In Sri Lanka, 29 years. Our companies are well-known among B2B food and beverage companies locally for production of the highest quality, competitive priced food packaging at excellent customer after sale-services.
